Stocktaking

- Stocktake all or part of the collection
- Can use a portable barcode reader

Reports

- An excellent, comprehensive reporting system unrivalled by all other lower-priced library automation systems
- Comprehensive item and borrower searches with many specialised reports
- Custom lists based on searches
- List items previously borrowed by students individually, in a class or year level
- Loan history analysis of borrowing
- Locate the most popular items borrowed by any group and/or year level and/or gender of students
- Comprehensive statistics - such as monthly loans, searches, reservations and detailed figures on the collection
- Searchable loan history log
- Searchable public access history log
- Save favourite searches and reports

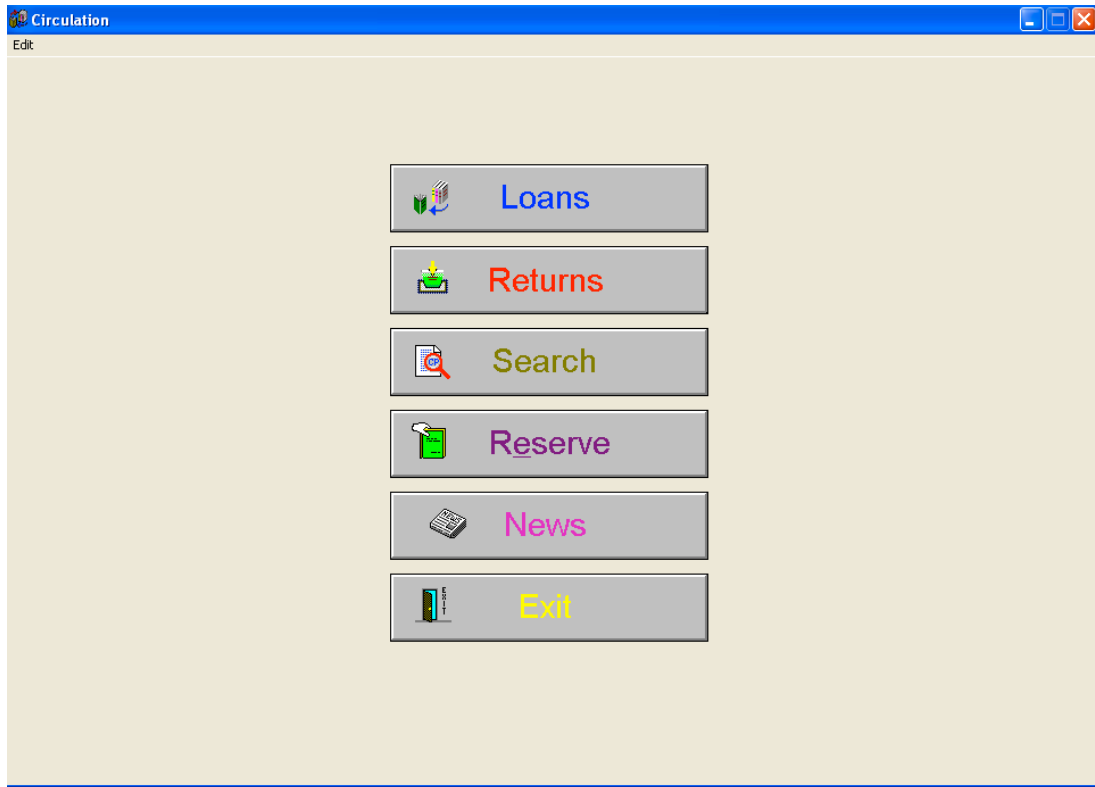

Searching (Public Access or OPAC and WebOPAC)

- Easy to use -- designed for young and older students
- Displays designed for touch screens and young children
- Choice of presentation styles for different ages and abilities
- Boolean style key word searches -- And, Or, Not
- Variable font size for ease of use
- Truncated word searches and "begins with" searches
- Webopac - Web based searching for tablets, iPads & Macintosh computers.

Circulation (loans, returns, reservations)

- Simple design for primary age children to do their own loans and returns
- Clean, uncluttered screen display
- Full borrower details privacy features
- Many "switches" that allow customised operation
- Quickly view and print out lists of items previously borrowed by students
- Reservations

Support

- Excellent support scheme \$242 per year Support includes phone, fax and email help with no call or time limits, regular newsletters and discounts.
- User groups established in most states
- Support and training available
- Highly responsive and quick user support - calls answered by the support team
- Software is modified with new features from user requests several times a year

Conversion of data from other library systems and databases

- Data from other library systems can be converted to Bookmark.
- Same barcodes can continue to be used in most cases.
- Systems we have converted include Oliver, Oasis, Prolib, Microfusion, Informatif, Dynix, Ocelot, MacSchool, PC School, Molli, Macbee, Mac n Library , Alice, FILMS, Athena, elibrary and others.

Borrowers

- Import borrower details from school admin. system
- Print class lists with borrower barcodes and photos
- Use student photos in loans
- Use student ID cards

Hardware and networking

- Works with all versions of Windows and Windows server, from windows XP onwards
- Can be used on older PCs but works best on modern fast computers
- Use CD-ROMs, databases, word processors, and any other software on the same computers -- maximum benefit of your technology investment

Backup

- Quick backup to USB or network
- Data checking and off-site archiving available

Affordable

- The total price for the Bookmark software package is \$825 (Australian, including GST). This outstanding price includes a site licence for use on multiple computers and networks located anywhere within the school or institution. Contact us for a detailed pricing including barcode labels and scanners.
